Kierkegaard's Journals and Notebooks Between 1815 and 1890, the German book market experienced phenomenal growth, driven by German publishers' dynamic entrepreneurial attitude towards developing and distributing books. Embracing aggressive marketing on a large scale, they developed a growing sense of what their markets wanted. This study, based almost entirely upon primary sources including over seventy years of trade newspapers, is an in depth account of how and why this market developed—decades before there was any written theory about marketing. This book is therefore about both marketing practice and marketing theory. It provides a uniquely well-researched account of how markets were developed in very sophisticated ways long before there was a formal discipline of marketing; for example, German publishers used segmentation at least 150 years before the first US articles on the subject appeared. Much of their experience was also shared by the UK and US book markets through international interactions between booksellers and other businessmen. All scholars of marketing will find this historical account a fascinating insight into markets and marketing, This will also be of interest to social historians, scholars of German history, book trade and book trade historians.

German Stories / Deutsche Erzählungen

Job 38-42 The Russian influence took root in the Chinese intellectual tradition that evolved after the Literary Revolution of 1917. When the Chinese communists turned to Russia for their inspiration they also accepted the Russian version of the novel's form and function in society. However, they did not accept it uncritically. Chinese understanding of the arts goes back for thousands of years and thus Chinese intellectuals brought their own kinds of tradition and intelligence to these new arts and political solutions. In this lucid study, the author demonstrates how Chinese writers, guided by Russian authors such as Chekhov, Turgenev, and Andreyev, created works of art that are both original and Chinese. However, he also shows that the familiar heroes of such famous novelists as Lu Xun, Yu Dafu, Mao Dun, and Ba Jin have a strong Russian flavor linked to prototypes in the Russian literary tradition. The author depicts the fortune of Soviet literature and the fate of the intellectual hero in the People's Republic of China. He believes that the humanistic May Fourth intellectual tradition, which inspired enthusiasm for classical Russian literature, has been revived with the publication of works like Dai Houying's Man ah, Man! and Zhao Zhenkai's Waves.

Five Great German Short Stories

Telling Tales In spite of the importance of the idea of the ‘tale’ within Romantic-era literature, short fiction of the period has received little attention from critics. Contextualizing British short fiction within the broader framework of early nineteenth-century print culture, Tim Killick argues that authors and publishers sought to present short fiction in book-length volumes as a way of competing with the novel as a legitimate and prestigious genre. Beginning with an overview of the development of short fiction through the late eighteenth century and analysis of the publishing conditions for the genre, including its appearance in magazines and annuals, Killick shows how Washington Irving's hugely popular collections set the stage for British writers. Subsequent chapters consider the stories and sketches of writers as diverse as Mary Russell Mitford and James Hogg, as well as didactic short fiction by authors such as Hannah More, Maria Edgeworth, and Amelia Opie. His book makes a convincing case for the evolution of short fiction into a self-conscious, intentionally modern form, with its own techniques and imperatives, separate from those of the novel.

A List of Books Suited to a High-school Library This collection draws together eight short stories from major figures in German literature from 1945 to 1955.

Rereading East Germany Germany has had a profound influence on English stories for children. The Brothers Grimm, The Swiss Family Robinson and Johanna Spyri's Heidi quickly became classics but, as David Blamires clearly articulates in this volume, many other works have been fundamental in the development of English children's stories during the 19th Century and beyond. Telling Tales is the first comprehensive study of the impact of Germany on English children's books, covering the period from 1780 to the First World War. Beginning with The Adventures of Baron Munchausen, moving through the classics and including many other collections of fairytales and legends (Musaus, Wilhelm Hauff, Bechstein, Brentano) Telling Tales covers a wealth of translated and adapted material in a large variety of forms, and pays detailed attention to the problems of translation and adaptation of texts for children. In addition, Telling Tales considers educational works (Campe and Salzmann), moral and religious tales (Carove, Schmid and Barth), historical tales, adventure stories and picture books (including Wilhelm Busch's Max and Moritz) together with an analysis of what British children learnt through textbooks about Germany as a country and its variegated history, particularly in times of war.

German Literature on the Middle East The present book for the first time links the thoughts of modern Western sociologists of literature with an overall description of the literary activities, attitudes, and views in late eighteenth-century Poland. Inspired by the studies of Bourdieu on literary fields and, more particular, S.J. Schmidt's study of the history of the rise and development of the social system 'literature' in Germany in the eighteenth-century (cf. Schmidt 1989), the author tries to establish whether Poland witnessed the rise of a more complex and (relatively) autonomous literary field or, as Schmidt calls it, a functionally differentiated literary system in the age of the reign of King Stanislaw August Poniatowski (1764-1795). Functionally differentiated literary systems - systems in which an increased number of literary agents and institutions produce, sell, buy, and criticize literary works according to capitalist principles - are the literary systems of today. As most scholars believe, their origins are to be found in most European nations in the late seventeenth and eighteenth centuries. Did such a modern literary system, albeit with certain limitations, rise in Poland in the years of the rule of Stanislaw A. Poniatowski? - this is the question the author of the present volume will attempt to answer. This volume is of interest to theoreticians and empirical researchers approaching literature from a sociological point of view, historians, and, of course, slavists interested in eighteenth-century literary developments in Poland.
